                                                                                                                                                                                                                                                                                                                                                                      US-08-507-362A-19
             Sequence 2, Application US/09146770
Patent No. 6187732
GENERAL INFORMATION:
APPLICANT: Fowler, Timothy
TITLE OF INVENTION: Mutant EGIII Cellulase, DNA Encoding
TITLE OF INVENTION: Such EGIII Compositions and Methods for Obtaining Same
FILE REFERENCE: GC546
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Patent No. 6562340

US-09-960-352-476

Sequence 476, Application US/09960352

Patent No. US20020137139A1

GENERAL INFORMATION:

APPLICANT: Warren, Wesley C.

APPLICANT: Marten, Wesley C.

APPLICANT: Matchialagan, Nagappan

APPLICANT: Matchialagan, Nagappan

TITLE OF INVENTION: NUCLEIC ACID AND OTHER MOLECULES ASSOCIATED WITH LACTATION AND FILE REFERENCE: 16511.006/37-21(1029))C

CURRENT APPLICATION UNMERR: US/09/960,352

CURRENT FILING DATE: 2001-09-24

NUMBER OF SEQ ID NOS: 15112

SEQ ID NO 476

LENGTH: 322

TYPE: DNA

ORGANISM: Bos taurus

OTHER INFORMATION: Clone ID: 03-BOVMS1-015-Q1-E1-A11

US-09-960-352-476
